SCHOOL REPORT,

OF THE SCHOOL BOARD OF SUNAPEE.

The schools in several divisions have been interfered with on account of sickness of the teachers, and some have been obliged to close their school. This has been unfortunate both for teachers and pupils. The balance of money in the treasury seems quite large, but at the time of making this report, three schools have not finished and it will require $140 to pay the teachers, and there are some wood bills to be paid later, so that after paying the bills which will soon be due, there will not be any more left than what will be needed to pay incidental expenses up to the time when next year's money can be drawn.

The money for repairs can be used to repair the shed in No. 9, when the district procures some land to set it on.

There is a need for another grade in the schools, between the primary and the higher grade. The primary schools are both crowded, and better work could be done if some of the pupils were placed in an intermediate grade, in a separate room.

The school houses are in good condition generally. No. 4 ought to be shingled the coming summer and some repairs made inside.

REPORT of BOARD of HEALTH.

The local Board of Health submit the following report:

Another year has passed, and we are glad to report that during the year there has been but one contagious disease reported to the Board of Health that proved fatal, that of Franklin J. Colby, who died of typhoid fever Feb. 14th., and we feel that the people of Sunapee have reason to be thankful, that through the long dry season, with low water in springs and wells, we have escaped with so little fever.

There has been reported 18 cases of measles, none of which proved fatal, also one case of diptheria. The Board have tried to do their duty in preventing the spread of the measles. There are several old people in town that have never had the disease, and they should have, with others, the protection the law gives them, and if those that have the disease in the home would co-operate with the Board of Health, without arbitrary regulations, there would be no need of the spread of the disease.

There has been upon petition of those interested in the purity of the water in Sunapee Lake, and for the upbuilding of the same, regulations issued by the State Board of Health for its protection, and while they are not all necessarily arbitrary in every respect, (still they may be made so) they do give the Board of Health around the Lake power to better protect its waters. Some wrongs have already been remedied, and others will be before the opening of another season.

The Board still maintain that situated as we are, the village should have a better water supply, as the present one, which only a few enjoy, is inadequate even for their demands, and we believe that nearly all of the village would take the water if a system of water works were put in, and while we would have the best water in the country for domestic purposes, we would also have a fire protection second to none.

The sewerage in the village is fairly well taken care of, but there is still at the Harbor, sewerage while it is as well taken care of as possible without heavy expense to individuals, should go to the river, and we hope the town will soon realize the fact and put in a sewerage that those around Post Office Square can connect

with, and thus dispose of some sewerage that has long been a nuisance, and dangerous, we believe, to the health of the public.

Respectfully submitted,

C. A. KNOWLTON,
W. W. CHASE,
ALBERT D. FELCH.
